

General Terms and Conditions: Participation in our Techionista Job Fair or View CVs of Techionista students

Techionista would like to keep the fee for women to be trained for a job in data science as low as possible. That is why we only ask our students of the Microsoft Azure Certified Data & AI Track of the Techionista Academy for a small contribution, namely: € 3,500 excluding VAT. In addition, we naturally ask for their undivided attention and time during this 4 months or 6 months, full-time or part-time training, which is already a considerable investment.

But that is of course not the real value of this training: it is much higher. If we were to use a commercial rate, this training would cost € 8,500 ex VAT. As mentioned, the student's own contribution is € 3,500 (ex VAT). This means that the remaining study costs amount to € 5,000 ex VAT. These additional costs are paid by Techionista because we believe in giving our students the best opportunity possible in developing their career in tech further.

To ensure the sustainability of our Academy and continue our mission in diversity and inclusion we request a fee of € 5,000 ex VAT. This fee **ONLY** applies should you attend our digital Job Fair, or by viewing CVs - **and successfully hire one of our students**. The fee will also apply should you successfully hire one of the viewed students up to one year after the Job Fair or CV viewing.

By participating in the services mentioned above you agree to our fee structure and declare that you are familiar with our terms and conditions.
